

To whom it may concern,

I am writing to highly recommend a remarkable variety act to you. “Pirates of the Colombian Caribbean Aerial High Wire Thrill Show” is most aptly named. This show features the sensational Murcia family, consisting of the patriarch Walter Murcia, his wife Victoria their sons Alexander and Antony and their nephew Andres. The show is pirate themed and absolutely suitable for all audiences and any venue. Initially developed for the circus, it seamlessly fits into the renaissance faire industry, theme parks and county fairs. The show has a scale that is truly impressive as it features a high wire over 30 feet in the air set into an art directed façade of a pirate ship. To the side there is a double spinning “wheel of death” where two of the pirates perform a death defying display of stunning skill. For all the thrills that the show delivers, it remains a family friendly performance delivered with humor and the level of discipline that only comes from a lifetime spent perfecting the skills and showmanship required for a display far above the average. To call the show spectacular is still to underrate it. Beyond the performances themselves, all the company members are easy to work with, adaptable and ready to participate in all the additional requirements presented in the festival venue such as daily parades and character “meet and greets”. Promotional appearances and interviews are gladly given and publicists will simply adore them, as their stories are involved and unique, given their 10 generations worth of experience, history and performances world-wide.

I cannot recommend this family and this show more highly. We wanted to feature a show to deliver a high-energy spectacle for our 25th anniversary season, and we could not have chosen a better representative for skill, artistry and delight. Should you have any questions, I would happily answer any inquiries directly. I’ve included my contact information below. Let me conclude that whatever your event, “The Pirates of the Colombian Caribbean Aerial High Wire Thrill Show” will exceed your every expectation.
